## Skills

| Skill | Level |
|---|---|
| GitHub | ●●●○○○ |
| Git | ●●●○○○ |
| SQLite | ●●○○○○ |
| HTML | ●●●○○○ |
| Django | ●●●○○○ |
| Python | ●●●○○○ |

## Languages

| Language | Level |
|---|---|
| Polish | ●●●●○ |
| English | ●●●●○ |

Since I completed my first "Hello world" application in the console, I have become passionate about Python first and then the Web development and I have known that it is more than just a job for me. I have been spending my free time learning Python and Django, and completing new projects ever since. I am deeply passionate about programming and strive to constantly learn, and improve my knowledge and skills. Please see some of the projects I completed below.

## Work experience

### Self- Taught Python Developer                                 Nov 2022

• Live Personal portfolio project with access to my current CV, my projects on GitHub, Linkedin, and a fully functional blog- developed with Django using HTML, CSS Bootstrap, and Git
• RESTful API Postit Django project- a simple Reddit clone. The project allows to authenticate of a RESTful API user, add, remove, and update posts and votes for the posts completed
• Just do it!- RESTful API Todo Django project- a website where a user can sign up for an account, and fully manage a todo list with the ability to create, edit, and delete- developed with Django using HTML, CSS Bootstrap, and Git
• BMI Calculator app- developed with Python using input functions, and if, and elif statements. The app allows you to input your weight and height and check where you are on the scale with a description

## Education
